Calculations for:

Longitude: -106.48600
Latitude: 31.76000
Time Zone: Mountain Daylight Time, MDT
Year: 2012

IMPORTANT: This calendar is generated based on a **single time zone**. If you have chosen daylight savings time, remember to **alter the sun set times accordingly for the dates that do not correspond to that time**. Due to the number of rules for daylight/summer time switching allover the globe, each portion of the globe having a different rule per time zone, per country, sometimes even per city, it would be impractical for us to assume a specific switchover date and time. Just add/subtract an hour according to the switchover date, for the given time zone that you have assumed for this calculation.

Up: Sun above horizon all day
Down: Sun below horizon all day

This service is brought to you courtesy of the Seventh-day Adventist Church.

Calculation of sunset and sunrise times are dependent on your exact latitude, and longitude coordinates. The continental maps do not provide accurate positioning. For more accurate results, manually enter latitude and longitude (Coordiantes south of equator, and west of Greenwich Meridian, must be negative), which can be obtained from **Xerox PARC Map Server.**

This Sunset Calculator is Copyright © 1998 by Adventist.org, written by Michael Dabrowski, from original implementation by Paul Schlyter, © ' 89, ' 92. City database compiled from data gathered by Xinhang Shen and Todd Westphal.
IMPORTANT: If you are getting incorrect results, and want to report a problem, read ALL documentation provided to make sure you have not provided incorrect data to the program. If you have read the documentation and wish to report a problem e-mail the webmaster.
